MEMORANDUM FOR: Executive Director-Comptroller

1. I think you will find the attached report covering the Office of Logistics Significant Accomplishments for FY 1967 quite interesting when you have a chance to read it. It highlights the diverse activities and major accomplishments of that office and I think demonstrates that the Office of Logistics is well organized and operating effectively with full credit to George Meloon and Jack Blake and their principal staff officers.

2. Perhaps the Director and Deputy Director would be interested in reading this report if their time permits.

OFFICE OF LOGISTICS SIGNIFICANT ACCOMPLISHMENTSFY 19671. Significant Contributions to the Agencya. Support Planning Team, Revolutionary Development Program, Vietnam 25X1

[redacted] Chief, Supply Division, OL, was the senior member of the Support Planning Team on TDY to Vietnam. In coordination with the Vietnam Station, this team developed support programs and related management controls for FY 1967 and FY 1968 to measure the resources required to carry out the Revolutionary Development Program for these periods. 25X1

[redacted]

c. Employee Parking Committee

At the request of the Deputy Director for Support (DDS), OL established and chaired an Agency employee parking committee. Its membership included representatives of the Offices of Logistics, General Counsel and Personnel, as well as the Directorates of Plans, Intelligence and Science and Technology. The committee report of findings and recommendations has been submitted to your Office.

SECRET

SECRETe. Snow and Weather Emergency Plan

A detailed snow and weather emergency plan was developed for the Agency. This plan was operational during the winter of 1966-1967 and proved effective.

f. Cost Reductions

Cost avoidance or reductions through negotiated effort for FY 1967 are projected at \$1.9 million. The beneficiaries of these reductions were the Offices of each Directorate. The cost reductions were arrived at on the basis of estimated and/or published prices versus actual prices after negotiation with the vendors. Current estimates distribute these savings as follows:

DDS&T	\$530,000
DDI	186,000
DDS	707,000
DDP	487,000

25X1

*SENSITIVE*h. Executive Dining Room

Responsibility for operation of the Executive Dining Room was transferred from the Office of the DCI to OL, effective 1 July 1966. A special fund has been established, out of dining room funds, to cover maintenance and related costs which previously were charged against the Logistics Services Division, OL. Also, monies have been set aside to maintain liquidity in membership deposits and a fund established for equipment replacement.

j. Leased Electronic Circuits Budgeting

A management analysis was completed recently relative to certain leased electronic circuits and facilities which, historically, have been budgeted for by OL. The majority of these circuits are utilized for encrypted transmission of information. The study resulted in a recommendation, which has been approved by your Office, that budgetary responsibility for these items be transferred to the Office of Communications, with the exception of service which is customer related. Assumption of budget responsibilities, as outlined above, contributes to the fulfillment of Agency responsibility for program budgeting.

2. Significant Management Accomplishments Within OL

a. Progress in Automated Systems

We have designed, with the cooperation of SSS/DDS and the Office of Computer Services, and are now testing an interim, Automated Contract Management System. This System will answer our immediate requirement for current contract information and more meaningful reports. In addition, it will provide a data base which can be expanded for use under the more sophisticated Support Information Processing System (SIPS) now being designed by the SSS/DDS. This System is independent of the DDS Management System and is under the operational control of OL. Additionally, in coordination with the SSS/DDS, OL is developing several Automatic Data Processing (ADP) subsystems, including requisitioning, warehousing, stock management, transportation, finance (property related), and procurement.

b. Construction of the Printing Services Building

This building is being constructed at the Headquarters Building site and conforms to the same architectural design. For the first time in Agency history, its printing facilities will be housed in a building designed specifically for a printing operation. Occupancy of this building is scheduled for early FY 1968.

c. New Modular Packing Technique

The development and adoption of a new modular packing technique has been most successful. It consists of pre-formed, molded, polystyrene containers for fragile and critical items and has resulted in numerous advantages. This "cocoon" method of packing has significantly reduced damage in shipment and transportation costs. In addition, it offers labor savings in packing, a smaller shipping unit, and satisfactory long-term safe storage.

d. Telephone Service and Facilities

Telephone service requirements continue to increase. Additional tieline facilities were created and, at our request, the C&P Telephone Company installed a new 1100 pair cable to improve facilities and provide alternate routing for Agency service. Telephone service to the DCI's residence was improved, and special security measures were installed. Interconnection of the Agency KY-3 system with the Washington Secure Voice Network is being accomplished. Dial tieline facilities are being completed between the Agency secure voice system and the US Air Force and VOCOM secure voice switching systems. When completed early in FY 1968, this interconnection with VOCOM will permit Agency KY-3 users to go worldwide on a secure basis.

e. Training

At the cost of \$11,536, OL placed 149 individuals in 111 different internal and external training courses, including 16 who attended Military Command or Senior Management Courses. Of particular satisfaction was the expansion of the ADP training. A total of 53 employees attended 23 courses in ADP at a cost of \$2,741. Forty-four employees participated in six runnings of the course entitled Support Services Review: Trends and Highlights. Six Support Career Trainees were acquired and were given OL orientation by rotation through the divisions [REDACTED]

g. Awards and Recognition

Four hundred and fifteen Logistics careerists, including Wageboard as well as GS positions, were promoted during this period. This figure is somewhat high because the spring 1966 promotion review carried over into FY 1967 before those actions were made effective. Twenty-four employees were granted Quality Step Increases. Two employees were awarded the Intelligence Medal of Merit, one the Certificate of Merit, and one was awarded both the Certificate of Distinction and the Certificate of Exceptional Service. Nine employees received awards ranging from \$15 to \$125 as a result of submitting suggestions which were adopted. The [redacted] Awards Program honored four employees of the [redacted] for superior performance, and twelve Unit Awards were issued. Cash awards ranging from \$25 to \$100 were made. 25X1

STAT

i. Personnel Staffing

(1) In January 1967, OL was advised that a reduction in ceiling from [redacted] positions to [redacted] positions would be effected not later than 30 June 1967. Through careful distribution of reductions, these positions were identified and deleted and, where necessary, personnel reassignments were effected. At the close of FY 1967, the OL on-duty strength was [redacted]. This figure included 10 clerical personnel assigned from the Office of Personnel pool for strength purposes only. In addition to those employees assigned directly to OL, another [redacted] logistics careerists are serving in positions outside OL. 25X9

(2) The 1967 summer rotation pattern has been completed and involved the transfer of 73 Logistics employees either to or between overseas posts during the fiscal year. Initial steps are being taken at this time to plan and implement re-assignments for the summer 1968 rotational period. Approximately 56 employees will complete overseas tours and will be eligible for rotation to the United States.

(3) During FY 1967, 88 Logistics employees resigned and 109 new employees entered on duty.

(4) During the same period, 20 employees retired and 24 obtained approval for retirement extensions. In conjunction with current emphasis on preretirement counseling, approximately 200 Logistics employees have been interviewed individually in connection with both the CIA and Civil Service retirement systems during the past year. Currently, 61 Logistics employees are eligible to retire.

j. Reimbursement to Other US Government Agencies

Through the joint efforts of OL and the Office of Finance, the concept of "constructive evidence of receipt" was adopted, and, effective 15 December 1966, all inter-departmental billings resulting from MILSTRIP/FEDSTRIP transactions are being paid upon receipt of billing. Payments are subject to adjustments by the billing agencies upon identification and verification of receipt by the Agency.

k. Teletypewriter Paper Stockage

The requirements for teletypewriter equipment utilized by the Agency, including quantity and color of duplicate copies desired, resulted in OL stockage of approximately 30 types of teletypewriter paper. Standardization actions during the past three years have resulted in current Agency stockage of only 18 types of paper. This number will be further reduced when present stocks of nonstandard items are exhausted. This results in reduced storage space requirements, fewer procurement and receiving actions, and lower inventory control costs.

l. Liaison with Operating Division and Staff Logistics Officers

Weekly liaison contacts are made with operating division and staff Logistics Officers to ensure timely support on the part of OL.

h. Utilization of Excess Materiel

A continuous review of lists of materiel declared excess by other Government agencies has resulted in OL obtaining considerable quantities of desired items at a relatively low cost. Through May of FY 1967, we have acquired excess materiel priced at \$6,851,927 for only \$342,751 (packing, handling, and transportation charges), or a cost avoidance of \$6,509,176. Materiel obtained included such items as parachutes, ordnance, 450,000 yards of blanket material, electron tubes, and an aircraft engine.

i. Contract Procurement

Final FY 1967 statistics on overall Agency procurement are not yet available. The trend indicates a higher dollar volume, but fewer and more complex contract actions. An example is [redacted] which warranted special handling and attention in the number of contracts involved totaling approximately [redacted]
